RENAULT WINS 'LCV MANUFACTURER OF THE YEAR' AT THE GREENFLEET MAGAZINE AWARDS

Renault is celebrating after its Light Commercial Vehicle (LCV) range scooped the prestigious 'LCV Manufacturer of the Year' honour at the GreenFleet magazine awards.

The GreenFleet awards reveal which organisations are making the most of existing technologies and fuels in order to reduce carbon emissions from their fleet vehicles. The awards are hosted by Southwark Council and supported by the Energy Saving Trust.

Beating off stiff competition from Ford and Volkswagen, Renault was awarded 'LCV Manufacturer of the Year' at a glittering ceremony at Shakespeare's Globe Theatre in London.

GreenFleet magazine presented Renault with this accolade, which was sponsored by the Energy Saving Trust, because of its innovative production techniques, outstanding design and its "comprehensive range of driver-orientated standard equipment and a host of well-focused optional extras enhance the package to meet customer requirements".

In addition, GreenFleet magazine's recognition of Renault as its 'LCV Manufacturer of the Year' praised the manufacturer for its dCi diesel engineering delivering tax-saving fuel economy, and outstanding clean and green emissions.

GreenFleet said, "Its (Renault's) diesel engineering, refined by applications across its motorcar ranges, provides a commensurate level of taxation-saving fuel economy and outstandingly clean and green emissions ratings".

Keith Hawes, Director, Fleet & LCV, Renault UK, commented on the award saying; "I am delighted Renault has won this award. Renault vans continue to enjoy huge success as the number one LCV manufacturer in Europe and this year has seen yet another increase in sales in the UK.

With our comprehensive range of vans as well as Renault's "Accord Technique" conversions, we have a van to suit most business requirements. With this accolade from GreenFleet magazine, Fleet Managers can be assured their Renault van will not only deliver top performance, it's also good for the environment too".
